#907596 \$2599

Miller Dynasty® 280 TIG Welder provides up to 280 amps of TIG arc and Stick arc welding output. At just 52 pounds, the Dynasty 280 can weld materials up to 3/8 inch thick, yet weight hundreds of pounds less than comparable welders in the same welding output class. The Dynasty® 280 TIG welder provides the basic features that are required for most AC/DC TIG or STICK welding applications using a simple, menu-driven interface.

DX #907550 \$4129

The Dynasty® 280 DX TIG welder offers full AC features, including advanced waveforms and wide ranges of balance and frequency.

Relative cut performance on mild steel

1 1/2" (38 mm) at 18 ipm (457 mm/min) recommended cut
2 1/4" (56 mm) at 5 ipm (125 mm/min) severance
1" (25 mm) mechanized pierce, 125 A output current, 100% duty cycle

Greater productivity – finish jobs faster with cut speeds 5 times greater than oxyfuel on 1/2" (12 mm) mild steel.

Low operating costs – consumables last up to four times longer than comparable air plasma systems.

Easy to use – simple controls, Smart Sense™ technology to ensure air pressure is always set correctly

Sharpen your cutting edge! Upgrade to Hypertherm's Duramax retrofit torches

6 times longer consumable life

Conical flow™ nozzle and spring electrode give you up to 6 times longer consumable life, when compared with standard PAC121, PAC123 and PAC125 torches and consumables.

More convenient

All Duramax torches use the same consumables, so you can consolidate consumables across multiple product families.

Easy plug-and-play upgrade

Duramax retrofit torches use the torch connection designed for your system which makes retrofitting easy.

HOBART 418 AWS E7018 H4R/E7018-1 H4R

Hobart 418 gives you all the flexibility you need in a general-purpose, low-hydrogen, mild steel electrode. It also has good out-of-position welding capabilities and provides an X-ray quality deposit. And this unique electrode is ideal for tacking prior to finish welding with Fabshield self-shielded, tubular wire. That's because the construction of the Hobart 418 allows removal of all the slag from the self-shielded wire.

WELDCRAFT

- Automates adding of filler metal in TIG Welding. All weld parameters can be duplicated.
- Dual Groove Drive Roll system accepts multiple wire sizes.
- Eliminates TIG rod stub loss. Cabinet keeps filler wire clean.
- Makes fully automatic machine TIG welding possible.
- Results are consistent and high quality welds

CK WORLDWIDE TIG WELDING COLD WIRE FEEDERS

CK Worldwide manufactures two models of Cold Wire TIG Feeders. The WF-1 feed unit is designed for use with CK "CWH" series hand torches for semi automatic welding applications. The WF-1 has an ON/OFF switch, pilot light, wire feed control, pulse/continuous feed switch, pulse wire on and off timers, and a remote switch receptacle.

STARTING @ \$2299

The WF-3 feed unit has all the features of the WF-1 feed unit plus controls for automatic operation with CK "CWM" series machine mounted machine torches. Additional controls include ON/OFF switches and timer controls for delay wire start and wire retract.

BLENDEX

The ultimate finishing tool

VERSATILE - The Blendex™ Unitized Technology is used for deburring, cleaning, blending and finishing in any kind of metal such as stainless steel, titanium, aluminum, alloys and even plastic and fiberglass.

LONG LASTING - The incredible wear resistance when working on sharp edges ensures maximum productivity.

SUPERB FINISH - Consistent and uniform, as close as possible to a mirror finish without the use of pastes.

NON-LOADING - The Blendex structure resists loading which minimizes heat buildup and prolongs the life of the disc.

FLEXIBLE - Choices of density: either soft with high conformability or hard for more aggressiveness. All densities can easily be dressed.

PROPYLENE — COMPARE THE DIFFERENCE YOURSELF

Why are Fabricators and Contractors Changing to PROPYLENE?

- SAFER.. Reduced chance of flashbacks, more stable
- 50% Reduction in cost over Acetylene
- 50% Reduction in gas pressure vs Propane... less gas
- 75% less cylinder change outs. (1 -63lb Propylene vs 4 - 300 cu ft. Acetylene)
- QUALITY CUTS.... Less grinding, better joint fit-up
- HIGHER Vapor Pressure in colder temperatures
- FASTER Cutting Speeds....productivity improvement
