Advanced Features Yet Easy to Use

LINCOLN ELECTRIC SQUARE WAVE® TIG 200
200 Amp AC/DC TIG and Stick Welding Power Source

- Simple user interface makes machine setup easy.
- Available features like pulse mode help make you a better TIG welder, faster.

Great TIG Machine for Aluminum

- High frequency starting for aluminum welding.
- Allows adjustments for wider or tighter arc configurations
- Built-in settings for more cleaning action.

TIG and Stick from One Power Source

- TIG welding for critical welds where precision and beauty appearance are important.
- Bonus of stick welding capability for outdoor work or thicker materials.

Take it Everywhere, Plug in Anywhere.™

- Plugs into a standard 120V or 230V circuit.
- Portable and convenient to use – only 46 lb (21 kg).

What's Included

- PTA-17 Series 150 Amp Air-cooled TIG Torch with Flexible Head and Ultra-Flex™ Cable Assembly with TIG Torch Parts
- Foot Amptrol™
- Regulator/Flowmeter with Gas hose
- Stick Electrode Holder
- Ground Clamp
- 120/230V Input Cords

SPEEDGLAS 100QR
07-0012-31BLQR

The Speedglas™ 9100QR quick release welding helmet with 9100 auto-darkening welding lens combines the features of Speedglas' popular 9100 welding helmet with the 3M™ H701-R hard hat. The quick release mechanism is molded directly into the helmet shell and allows the user to easily detach the welding helmet from the hard hat. The welding helmet just as easily snaps back into the hard hat rail system when the user is ready to weld again.

Hypertherm THE WORLDS MOST ADVANCED PLASMA CUTTERS

Powermax30® AIR

Professional-grade plasma system with internal air compressor for high portability and easy metal cutting.

- Eliminates time and cost of an Air Compressor
- Plug into any 120 or 240 V power with Auto-Voltage™ and included plug adapters.
- Cuts 3/8" @ 10 ipm, 5/16" @20 ipm
- Lightweight 29.8 lbs with Torch

088096

- Operate it anywhere with the internal air compressor.
- Plug into any 120 or 240 V power with Auto-Voltage™ technology and included plug adapters.
- Highly portable. The smallest, lightest weight system in its class.

Relative cut performance on mild steel

- 1 1/2" (38 mm) at 18 ipm (457 mm/min) recommended cut
- 2 1/4" (56 mm) at 5 ipm (125 mm/min) severance
- 1" (25 mm) mechanized pierce, 125 A output current, 100% duty cycle

Greater productivity – finish jobs faster with cut speeds 5 times greater than oxyfuel on 1/2" (12 mm) mild steel.

Low operating costs – consumables last up to four times longer than comparable air plasma systems.

Easy to use – simple controls, Smart Sense™ technology to ensure air pressure is always set correctly

Sharpen your cutting edge! Upgrade to Hypertherm's Duramax retrofit torches

6 times longer consumable life

Conical flow™ nozzle and spring electrode give you up to 6 times longer consumable life, when compared with standard PAC121, PAC123 and PAC125 torches and consumables.

More convenient

All Duramax torches use the same consumables, so you can consolidate consumables across multiple product families.

Easy plug-and-play upgrade

Duramax retrofit torches use the torch connection designed for your system which makes retrofitting easy.

**Auto or Manual:
The Choice is Yours**

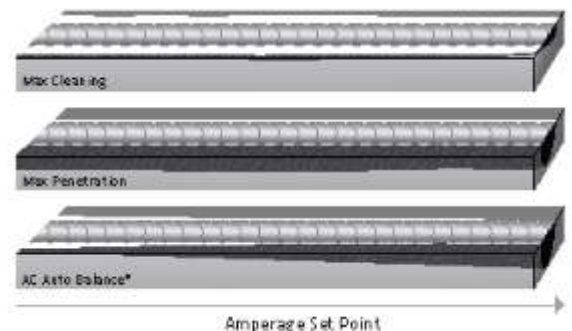

Effortless arc control

Extremely fast arc response and stability for the smoothest and most efficient weld possible.

Simplicity when you want it

Activate Intellistart™ technology to automatically provide for softer starts and minimal distortion on thinner materials and hotter starts required for thicker materials. Optional AC Auto Balance® technology offers simplicity by automatically providing the optimal mix of cleaning and penetration when welding aluminum.

Customization when you need it

AC Wave Shape control enables you to customize the arc for critical aluminum welding requiring:

- » A higher degree of penetration on thicker materials.
- » Increased cleaning action in breaking through heavy oxide layers.
- » Narrower arc profile enhancing control around corners and other tight configurations.

- Automates adding of filler metal in TIG Welding. All weld parameters can be duplicated.
- Dual Groove Drive Roll system accepts multiple wire sizes.
- Eliminates TIG rod stub loss. Cabinet keeps filler wire clean.
- Makes fully automatic machine TIG welding possible.
- Results are consistent and high quality welds

CK Worldwide manufactures two models of Cold Wire TIG Feeders. The WF-5 feed unit is designed for use with CK "CWH" series hand torches for semi automatic welding applications. The WF-5 has an ON/OFF switch, pilot light, wire feed control, pulse/continuous feed switch, pulse wire on and off timers, and a remote switch receptacle.

WALTER
Surface Technologies
BIG BUFF III

LIGHT AND EASY TO CONTROL
Sleek, slim line design and extra light weight let the operator work continuously without fatigue.

FULLY ADJUSTABLE SPEEDS
Electronic speed control with DYNAMAX electronics ensure constant speed under full load for consistent and uniform surface finishing.
PLENTY OF TORQUE
Powerful, high efficiency motor delivers plenty of torque even at lower speeds for buffing and polishing with ease.

30A265 \$489

30A267 \$649

LINE MATE III

THE LINE FINISHING SPECIALIST

FIRST IN POWER AND ENDURANCE
High efficiency motor and gear drive combined with state of the art electronics give the Line-Mate III plenty of torque, even at lower speeds. With a 25% increase in power, the Line-Mate III is guaranteed to reduce your finishing times and costs.

FIRST IN CONTROL AND COMFORT
Fully integrated DIALSPEED control with DYNAMAX electronics ensure that spindle speeds are fully adjustable and remain constant under load for a consistent and uniform finish. Skilled operators will be able to match any line or finish with minimum effort.

30A268 \$599

30A269 \$799

SURFOX 104 WELD CLEANING SYSTEM

Industrial, self-contained weld cleaning system with integrated electrolyte tank and automatic pump dispensing. Manual or automatic/variable-speed pump cycling delivers the right amount of electrolyte continuously to the workpiece.

SAFE- Surfox-T cleaning solution is laboratory certified to be safe and poses absolutely no health risk to operators.

FAST - Cleaning and passivation of a typical TIG weld is done at a speed of 3 feet per minute.
